

Heart Disease Diagnostic Aid

Research / educational prototype — not a medical diagnosis.

Patient information

Age	Maximum heart rate (thalach)
50 - +	152 - +
Sex (dataset code)	Exercise-induced angina (exang)
0 ▼	0 ▼
Chest pain type (cp)	ST depression (oldpeak)
3 ▼	1.00 - +
Resting blood pressure	Slope
132 - +	1 ▼
Cholesterol	Number of major vessels (ca)
220 - +	4 ▼
Fasting blood sugar > 120 (fbs)	Thalassemia code (thal)
0 ▼	3 ▼
Resting ECG (restecg)	
0 ▼	

Predict risk

Predicted probability

51.0%

The model predicts the positive class.

This output is a machine-learning prediction from the supplied research dataset. It must not be interpreted as a clinical diagnosis.
